SUMMARY

Software Development professional with 1+ year of hands-on experience in web application development, specializing in React.js, JavaScript, and responsive UI development. Experienced in REST API integration, component-based development, debugging, and root cause analysis. Strong analytical and problem-solving skills with experience collaborating cross-functionally to improve application functionality and reliability.

EXPERIENCE

Project Trainee

Chegg Inc. ***April 2025 – April 2026***

- Developed and enhanced responsive user interfaces for the Chegg Expert platform using **React.js, JavaScript, HTML, CSS, and Tailwind CSS**, following component-based development practices to improve usability across desktop and mobile devices.
- Worked on **REST API integration and testing**, troubleshooting application issues and performing root cause analysis using API responses, error logs, and browser debugging tools.
- Collaborated with developers, QA, and product teams to validate bug fixes, test feature releases, document technical solutions, and maintain code using **Git and GitHub**, contributing to application stability and efficient issue resolution.

Software Developer Intern

POD IT Services. ***Dec 2024 – March 2025***

- Integrated **Google Places API** into user onboarding, **improving address accuracy and efficiency by 30%.**
- Built a multi-session employee **check-in system** with automated break deductions for accurate time tracking.
- Automated multi-location warehouse stock transfers, reducing manual operational effort by 50%.
- **Documented technical workflows** and solutions to enhance the internal knowledge base.

TECHNICAL SKILLS

Development: React.js, JavaScript, HTML, CSS, TailwindCSS, Node.js, Express.js, REST APIs, Redux-Toolkit, API Integration.

DataBase: MongoDB, SQL.

Tools: Postman, Git, GitHub, VS Code, Figma, MS Excel.

PROJECTS

SplitX – Expense Splitting Application

- Developed a full-stack expense management platform using **ReactJS, NodeJS and MongoDB** with **RESTful APIs** for user authentication, group creation, and transaction tracking.
- Implemented **backend validation and error handling** to ensure accurate expense calculations and system reliability.
- Optimized **UI responsiveness** using React hooks and Tailwind CSS to improve user interaction across devices.

Portfolio Website

- Developed a personal portfolio website using **ReactJS, TailwindCSS, and modern component-based design.**
- Implemented **reusable UI components, responsive layouts, and smooth UI transitions.**
- Added **dark/light theme support** using state-based theme switching.

EDUCATION

Bachelor of Technology in Computer Science and Engineering *2020-2024*

SRM Institute of Science and Technology CGPA: 8.14
